

FRANCE | 2016 | Saint-Georges Saint-Emilion

Château St. Georges

> GRAPE VARIETIES

Merlot 80% Cabernet Sauvignon 10 %Cabernet Franc 10%.

The typical grape varieties of the right bank of the Gironde Estuary. It is here that we find the 'terroir' perfectly adapted to producing wines that are perfectly balanced and elegant with a lot of colour.

> VINTAGE

A very structured, ageing and sophisticated wine, among the best vintages of our history.

> ANALYSIS

DEGRE 13.5 %

The history of Saint-Georges goes back to Gallo - Roman times.

The domain extended over 1000 'arpents' which represents 263 hectares and corresponds approximately to the surface of the entire parish of Saint-Georges.

The Château **Saint-Georges** and its land was sold on 27 October 1602 by Henry IV to Jean Barbot for a sum of 1500 pounds. The purchaser attained, in addition, the title of Baron.

It was the 'Sieur de Bouchereau' the new and last Baron of Saint-Georges who commissioned the reputed neo-classical architect Victor Louis (Grand Theatre of Bordeaux, Place de Palais Royal in Paris) to reconstruct the feudal château in 1772, keeping nevertheless the four corner towers.

If the Revolution spared this jewel of 18th century architecture, phylloxera destroyed its vines and the estate started to go downhill. It passed though the hands of several owners until 19 November 1891 when it was purchased by Pétrus Desbois who restored the vineyards by grafting the French vines with American rootstocks.

TASTING

Deep ruby and dark garnet shining dress

The nose is expressive and complex: dark ripe fruits, sweet spices, woody stylish, fragrance of rose and peony.

The palate is rich, full-bodied. Tannins are well integrated and fine with sappy black fruit, notes of graphites, soft spices.

SERVING SUGGESTIONS

Rib steak, calf sweetbread, cheese of Rochefort.

> VINEYARD

Terroir: Clay-limestone soil **Vine Density:** 5500 vines/ha

Climate: Caracterised by light frosts and high degree of sunshine. Annual rainfall of 300mm mostly occurring during the summer. Marked difference between night and day temperatures (in summer 15 °C during the night rising to 30°C during the day).

Average Age of the Vines: 10 to 50 years.

Yield: 46.88 hl/ha for 2013 vintage.

Situation : In the centre of a triangle between Saint-Emilion, Montagne, Pomerol, our vineyard is situated on a hill and dominates the entire appellation of Saint-Georges Saint-Emilion. Our vineyards completely surround the Château

Origin-Appellation: The geological name of the bedrock of Saint-Georges is 'Sannosien' with 'asteries de stampien' limestone. It is from these soils that one produces the best wines of the appellation of Saint-Georges Saint-Emilion. The wines of Château Saint-Georges are amongst the finest. They are fullbodied with a beautiful ruby colour and develop a distinguished bouquet, due in particular to its special bedrock.

> WINEMAKING

Viticulture: To temper the natural vigour of vines, we carry out a short pruning at the end of winter. In addition during the summer we do a 'green harvest' in order to help ripening and the concentration of the remaining bunches. The date of harvest is decided by tasting and analysis.

Harvest: By machine and by hand in the early morning. A double sorting table is used to ensure that only the finest grapes go into the vats for fermentaion.

Vinification: Cold soak at 10 to 12°C for four days in order to extract tannins, aromas and anthocyanin colour pigments. Alcoholic fermentation with selected yeasts in temperature controlled stainless steel vats which regulate temperatures to between 20°C and 28°C during fermentation and enable regular 'pushing down' and 'pumping overs' to take place. Maceration takes place over a period of five weeks. Malolactic fermentation in stainless steel vats.

Ageing: 12 months in French oak barrels (225 litres). Bottling takes place with a tangential filter.
